Upgrade Components

The following are the only allowed upgrades to the Mainstream and Power User specifications and may be requested by the ordering agency. If an offeror does not currently market a component as listed, the offeror may choose to “no-bid” the component or may propose a component of comparable or greater functionality/capacity.

Provide a fixed price for each upgrade component in the table below. As an alternate option, for each upgrade component that is not bid separately, the offeror may quote a separate notebook configuration price with that component substituted into both the mainstream and power user specifications.

Upgrade Component Type	Description	Mainstream Component Price (or separate config price)	Power User Component Price (or separate config price)
